Shirt Fit Guide

This guide has been created to ensure your shirt fits you comfortably. You will need:

- an Imperial tape measure with inch marks (part of your Visual Toolkit)
- your most comfortable T-shirt
- a well-lit, flat work surface

You'll need to take three or four specific measurements from the shirt as identified for each style.

1. To begin, orient your shirt on the work surface as shown in the illustration for the measurement you are taking. Make sure your shirt is as flat as possible for the most accurate results.
2. Record each of the required measurements.
3. Match those measurements to the closest size possible for the shirt style you need.

You're one step closer to a shirt you'll feel and look great in.
